

FREE PRINTABLE | EASY SUN COAST

Rain or Heat Backup Planner

Change the shape of the day without crossing the region

USE THIS WHEN

The original beach or outdoor plan no longer fits the weather, heat, or energy level.

Use the site for current access, hours, parking, closures, and exact stop selection.

Rain or Heat Backup Planner

Four useful weather pivots

Pivot	Good fit	Why it works
Culture-first reset	Sarasota	Arts, food, and walking can stay more controlled than a beach-first plan.
Downtown + food	Fort Myers River District	Walking, food, and indoor options can stay close together.
A real town day	Venice	The beach can become secondary without losing the outing.
Shift inland	North Port	Useful when another coastal answer no longer fits at all.

Keep it simple

- Keep the backup near the base town.
- Shorten the exposed part before relocating across the region.
- Rescue the day, not the original plan.

Rain or Heat Backup Planner

Weather-pivot checklist

- ☐ Check radar and heat before leaving.
- ☐ Choose one nearby fallback area.
- ☐ Know what gets cut first if conditions worsen.
- ☐ Keep food, shade, bathrooms, or indoor relief in the same zone.
- ☐ If the outdoor piece disappears, keep one real anchor instead of rebuilding the whole day.
- ☐ Save energy for any evening plan that still matters.
- ☐ Use the live guide for current closures and access.
